VELO SPORT PHOTO

" We Capture Fast"

Velo Sport Photo is proud to be the official photographer of the 2010 OMPA Championships. At Velo Sport Photo we pride ourselves on quality not quantity. Our photographers focus on only one swimmer at a time. All images are processed by Bay Photo, a professional lab located in Santa Cruz, California, which has been catering to top pros since 1976. Bay Photo hand color corrects each print, ensuring superb color and consistency from print to print. All prints are carefully flat-packed — damage during shipment is almost unheard of. Quality is guaranteed.

Images taken during the meet require a \$20.00 deposit per swimmer per event. The \$20.00 deposit can be applied towards the purchase of images and merchandise at www.velosportphoto.com. Our target goal is to have images posted within 72 hours of the conclusion of the swim meet. Sometimes we may be faster and in some extreme cases we may be a bit slower depending on the quantity of images that need to be sorted, cropped, corrected and posted. When all images have been posted we will send out an email alerting all customers images are available to view and purchase.

There are circumstances when we may not capture the perfect image,

- A swimmer may do a "no breather" on their first lap and their face is not visible to the camera on their final lap.
- A swimmer may have a very powerful kick and we may not see their face because of the water spray.
- The clerk of the course may combine heats and we miss your swimmer.
- Sometimes we just may miss a shot.

In any case if you are not satisfied with your images for any reason, we will gladly refund your deposit. After all, we want you to love the images of your swimmer and enjoy the memories for a lifetime.

Feel free to contact us with any questions @ info@velosportphoto.com.
